Specialists
Provide?**

Universal's Early Intervention Program

In weekly sessions, we will come to your child's most natural environment and work one on one with your child and the parent or guardian present. If your child is in day care, we will work with the teachers to help them learn new ideas as well. Our goal is to help build cognitive ability, fine/gross motor skills, language, self-help, and social emotional development through a variety of playful activities. We will also provide community resources such as area playgroups, parks, educational resource stores, and a quarterly community resource newsletter for our families.
